LUKE ELSE

SOFTWARE ENGINEERING APPRENTICESHIP (LEVEL 6)

QINETIQ

I am excited to be applying for this opportunity to become a software engineer at QinetiQ.

During the 5 years I spent within the Royal Air Force Air Cadets I got the chance to visit MOD Boscombe Down where I experienced some of your companies work and technological advancements, which was inspiring to say the least.

As well as my passion for aviation, I have also pursued an interest in computer science, in particular software engineering, and so applying at QinetiQ is the perfect way for me to expand my skillset and attain a career in the field.

I consider myself an incredibly hardworking individual that is quick to adapt to any situation. I relish a good challenge and would enjoy getting involved with your team.

I really hope that you are able to seriously consider my application and look forward to hearing back from you.

Sincerely,

Luke Else
